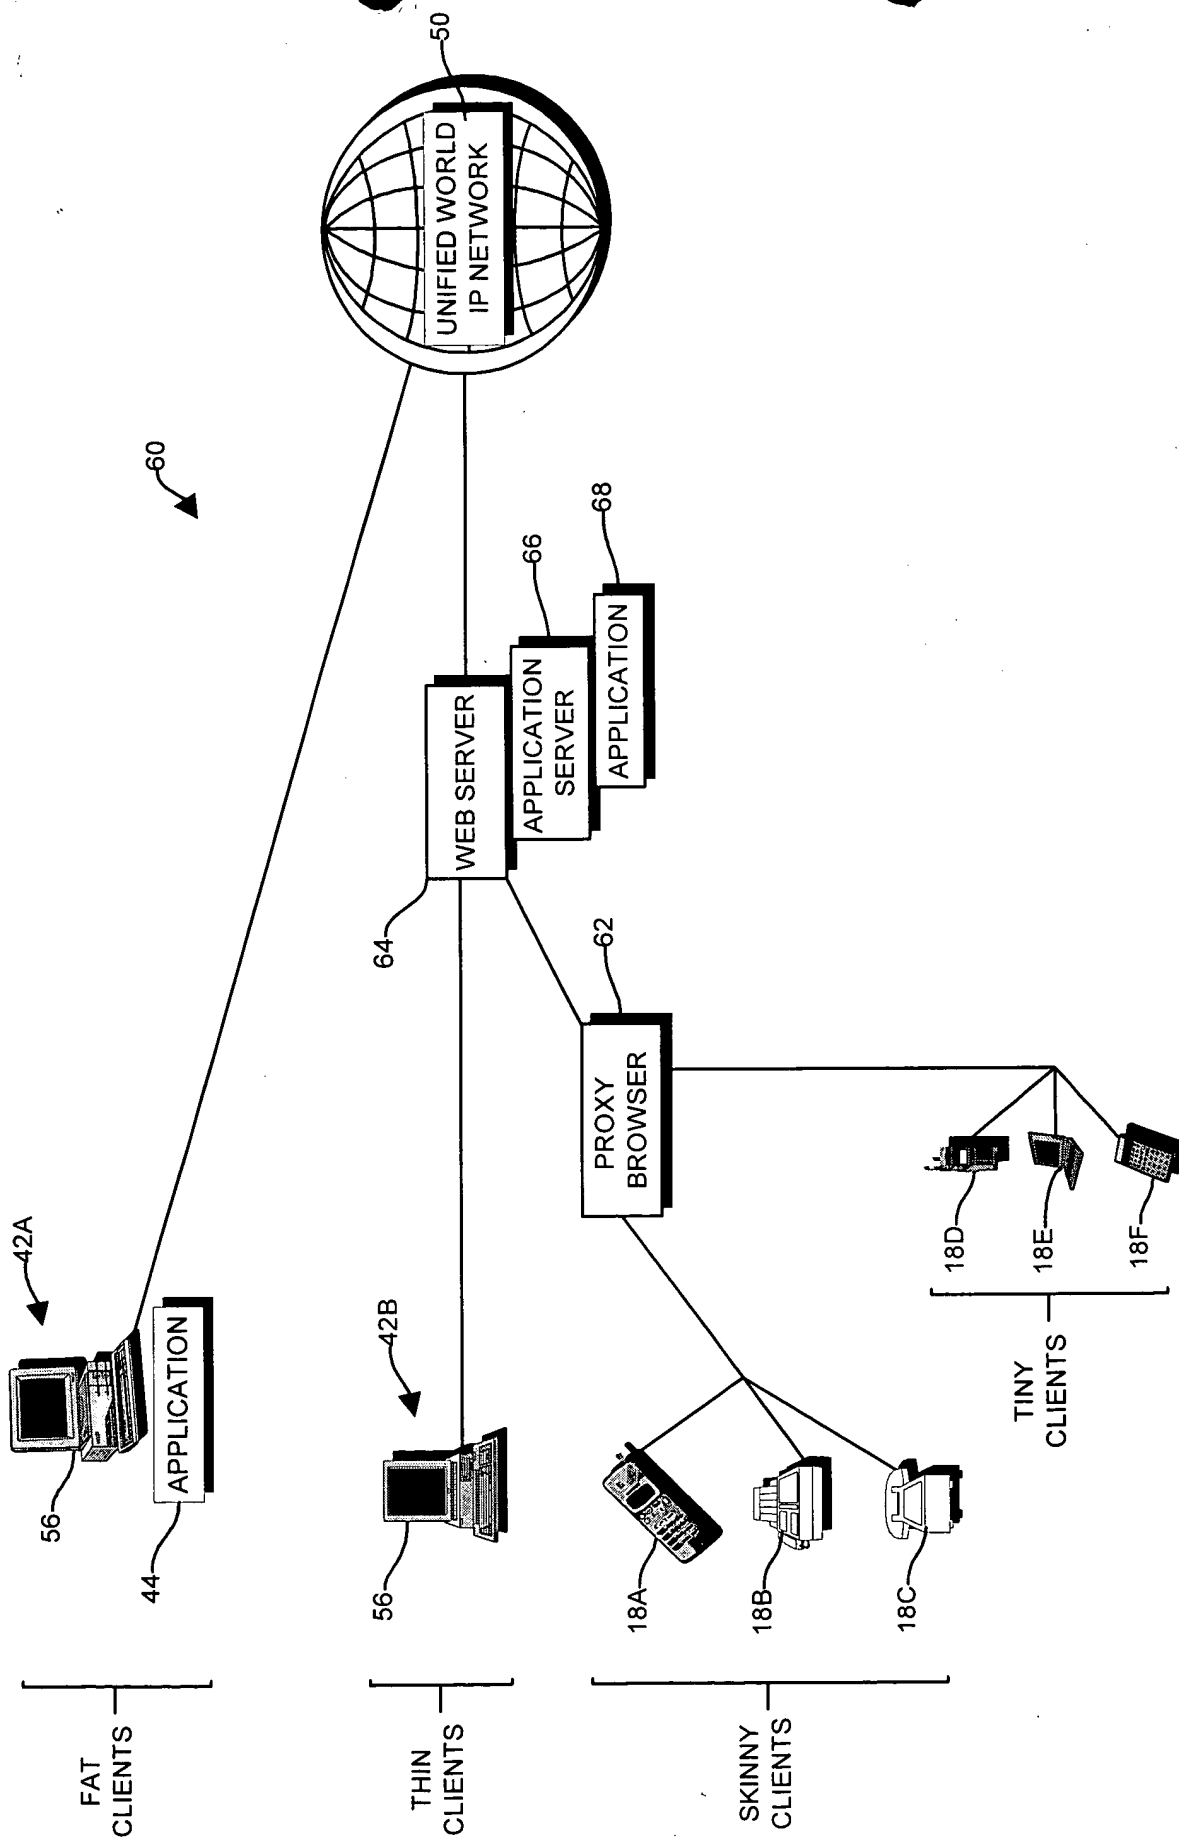

FIG. 1

FIG. 2

The diagram illustrates a web server architecture (66). At the top is a **64 WEB SERVER (E.G. APACHE)**. Below it is the **222 WEB SERVER INTERFACE (E.G. PHP)**. The interface (222) is divided into three main sections:

- 220 XML PARSER** on the left, which interacts with the **100 XML BROWNIIE REGISTRY** and the **96 APPLICATION DOCUMENT DATABASE (E.G. XML)**.
- 224 APPLICATION RUNTIME** on the right, which contains:
 - 230 TAG IMPLEMENT**
 - 98 U.I.** (User Interface)
 - 226 LOGIC**
 - 228 PROC.** (Process)
- 232 LIBRARIES (E.G., "API", "DLL"...)** at the bottom of the interface section.

 The interface (222) is connected to the web server (64) via a bidirectional arrow. It also interacts with external protocols at the bottom: **240 IMAP**, **242 LDAP**, and **244 SMTP**, each via a bidirectional arrow.
